

10 POLICY RECOMMENDATION

01. Incentivize Sustainable Practices

Implement financial incentives for companies adopting eco-friendly materials and processes to drive sustainability in textile production.

Create funding programs for joint research projects between industry, academia, and government to advance green technologies in textiles.

02.

Support Collaborative R&D Initiatives

03. Establish Industry-Specific Training Funds

Allocate resources to develop specialized training programs that equip the workforce with skills in sustainable practices and digital innovation.

Introduce regulations that encourage recycling, waste reduction, and the use of sustainable materials in textile manufacturing.

04.

Promote Circular Economy Legislation

05. Enhance Digital Infrastructure

Invest in digital infrastructure that supports data sharing and collaboration across the textile value chain to improve efficiency and innovation.

Develop platforms that connect textile stakeholders with experts, resources, and best practices to foster continuous learning and collaboration.

06.

Facilitate Access to Knowledge Networks

07. Strengthen Regulatory Frameworks

Create clear guidelines that support the integration of sustainability and digital technologies while ensuring resilience within the textile sector.

Promote initiatives that bring together public entities and private companies to jointly address challenges in the textile industry, especially in sustainability and technology.

08.

Encourage Public-Private Partnerships

09. Engage Local Communities in Policy Development

Involve community stakeholders in policymaking processes to ensure that initiatives reflect local needs and promote inclusive growth.

Establish mechanisms to assess the effectiveness of policies aimed at enhancing sustainability and digitalization in the textile industry, allowing for continuous improvement.

10.

Monitor and Evaluate Policy Impact
